

The airwaves are publicly owned, and are on loan to radio and TV broadcasters only to the extent they take into account the public interest. That is the law. The consolidation of ownership of stations, such as represented by Sinclair Broadcasting, leads to the kind of unbalanced, partisan use of the airwaves that Sinclair is proposing. Our democracy depends on our being informed of some common truths. The fragmentation of the nation is due in part to the private control and partisan use of airwaves. I object to your ruling regarding Sinclair's proposed "news" show that is not news and is partisan. Thank you for considering my views.
